👤 Profile

Aspiring Software Engineer with strong experience in full-stack development, scripting, and AI-powered systems. Founding member and technical leader with hands-on experience in building scalable products, automating workflows, and delivering impactful, user-centric solutions.

✂ Technical Skills

- **Programming:** Python, JavaScript, C, C++, SQL
- **Frontend:** React, HTML5, CSS3, Bootstrap
- **Backend:** Flask, Node.js
- **Databases:** MySQL, MongoDB
- **Cloud & Tools:** AWS (Basics), Git, GitHub, Figma
- **Specializations:** AI/ML, NLP, Data Analysis, UI/UX, Scripting

🎓 Education

- **B.E. Artificial Intelligence & Data Science** 2023 – Present
ISBM College of Engineering, Pune
CGPA: 8.23 / 10
FY SGPA: 8.72 | SY SGPA: 7.91 | TY: Result Awaited
- **HSC – Science** 2021 – 2023
Creative Public Jr. College
Percentage: 69.67%
- **SSC** 2013 – 2021
St. Aloysius Convent High School
Percentage: 88.87%

💡 Projects

- **Personal Finance Manager** Python, React, MongoDB
 - Built a multi-user financial tracking system with forecasting and budget insights
 - Developed scripting modules for automated CSV processing and data transformation
 - Implemented predictive analytics for intelligent financial recommendations
- **DigiCredLocker (DCL)** Node.js, React, MongoDB
 - Developed a digital credential platform with secure verification system
 - Implemented backend automation scripts for bulk certificate issuance and validation
 - Designed scalable architecture supporting multi-issuer environments
- **Event Platform (Event Ninjas)** React
 - Built a premium event management platform with modern UI/UX
 - Integrated dynamic scripting for handling event workflows and user interactions
- **AISA Club Website** React, JavaScript
 - Developed responsive website with event management and dynamic content features
 - Implemented client-side scripting for interactivity and performance optimization
- **SAMM – AI Assistant** Python, NLP
 - Created AI voice assistant with task automation and NLP-based interaction
 - Developed scripts for system control and workflow automation

Experience

Founding Member, CTO & Chief Advisory – Innovara Dynamics

2025 – Present

- Leading technical strategy, product architecture, and development of scalable digital solutions
- Designing and implementing full-stack applications with focus on performance and user experience
- Developing automation scripts and backend workflows for efficient data processing and operations
- Collaborating on product vision, innovation strategy, and business-driven technology decisions

Achievements

- Smart India Hackathon Participant – 2025
- Organized “AlgoRush” coding competition
- Machine Learning Certification – Coursera

Leadership

- Technical Coordinator – AISA
- Vice President – Innovation Cell
- AWS Cloud Club Lead

Languages

English, Hindi, Marathi
